

# Track Cleaners

## OO / HO Motorised Track Cleaner

Product code: **B800**

POSSIBLY .....  
THE BIGGEST SELLING MODEL  
IN THE  
WORLD!

The Dapol Track Cleaner enables the modeller to have a pristine track surface by offering the following functions:  
Fine scrub cleaning + High suction vacuum + Light application of cleaning fluid +  
Smooth polishing of track surface + Brush sweep - all contained within the one model.

The model operates on standard DC 'out of the box' but is also 8-pin DCC ready for fitting of either single or dual function chip and has NEM coupling pockets compatible with US HO Kadee Buckeye & EU HO Roco style couplings.

*The Track Cleaner is fitted with a motor to enable on-board driving of the cleaning functions and therefore it still needs to be hauled by a locomotive. However as it is DCC ready, by fitting the chip you will have independent control over the various functions.*

Three scrubbing and three polishing pads are including within the pack.

### Accessories : Spare Pads : Cleaning Fluid

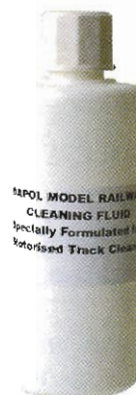

**B803**  
Accessory Pack

Contains all and every spare part needed to keep your track cleaner in tip-top working condition

**B804**  
Spare Pads

Contains 10 x cleaning and 20 x polishing pads

**B805**  
Track Cleaning Fluid

100ml bottle of specially formulated liquid for use with our track cleaner

## Tomix 'N' motorised track cleaner

Product code: **6421**

This superb DC-only product enables the complete cleaning of 'N' track. It scrubs, vacuums and polishes as it travels.

Product code:  
**6424**

Pack of spare cleaning & polishing pads

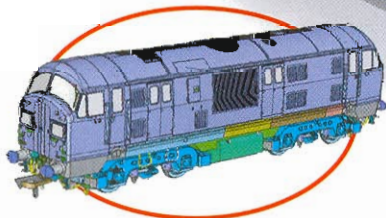

# '00' Locomotive

## Class 22

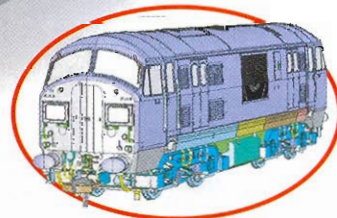

NEW  
model

Photograph reproduced with the kind permission of the Estate of the late R.C. Riley

examples of the Cad drawings

The Diesel Hydraulic Class 22 locomotive was introduced in 1959 with 57 units being built.

They carried both BR Green and BR blue liveries with a few 'individual' locomotives slightly altering from this regime.

They also had many sub-details amongst the class over their lives which Dapol hope to faithfully replicate on our first OO gauge model locomotive for many years.

With help gained from the modelling fraternity and specialist diesel hydraulic organisations and forums, we have been able to piece together most if not all the differences between the classes using long forgotten plans and photographs.

Our models will feature state of the art mechanisms with full 21 pin DCC onboard connectivity and the provision for a large sound speaker within the fuel tank.

At release Dapol will be supplying 6 different running numbers in 300 of each number. This will allow us to 'refresh' the market with additional running numbers and livery/detail variations over the coming years.

**D1000a:** O6322 BR Blue split box full yellow end

## '00' Containers

We will continue to release a stream of different liveried containers based on 20ft standard - 40ft standard - 40ft High Cube - 40ft Curtain Sided.

Our Containers are offered in Twin-Packs and feature Opening Doors and, on our High Cube versions, we even include customer-fit separate rear door bars for extra added realism.

They are fully compatible with our range of 'FEA Spine' - 'Megafret' - 'KTA/KQA Pocket' Wagons.

Due to the rapid sales and quick turn-around of new liveries, it is impossible to

show future liveries here and the photos below of previous models are for reference only.

We suggest that you use our website [www.dapol.co.uk](http://www.dapol.co.uk) to obtain ongoing accurate product information.

# self-assembly '00' plastic kits

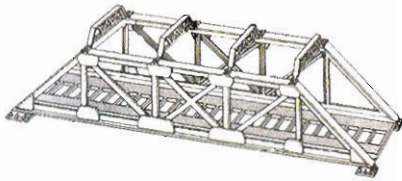

The Dapol factory operates under a 'Green' policy. No plastic is ever 'Thrown Away'. We re-use plastic through a system called 'Re-Grinding'. Our kits are made with 'Re-Grind' plastic and therefore the colours of the plastic will be different between batches. This does not affect the quality or performance of the kit. After four cycles of 'Re-Grinding' any residue plastic is sent to a Re-cycling plant where it is used to form the protective banding around newly planted trees.

for 5/7 plank wagons

## Special commission wagons + locomotives!

Dapol are the leading supplier of 'special commission' wagons in the UK - and probably the world! Because production is undertaken in the UK, we can set our minimum wagon order level at just 150 units and can offer a delivery time of about 12 weeks from confirmation of final artwork approval.

The good news is that we can also offer a similar service for N-gauge LOCOMOTIVES. Our minimum order level for stock locomotives is just 250 units.

If you are interested in either wagons or locomotives - please contact us. We are here to serve.
